

# Eggs produced and supplied in Queensland must have an accreditation.

Accredited activities include producing, packing/repacking and grading eggs.

“Supply” includes selling, bartering or giving eggs away.

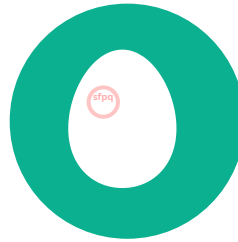

An accreditation is not required to produce eggs for personal consumption.

Cracked or dirty eggs cannot be supplied.

**Supplying eggs without an accreditation (even for free) is a serious food safety offence.**

Egg stamping is mandatory in Qld to ensure traceability.

Scan the QR code to learn more or apply for accreditation.
